94 DAYS PAST

272 TO COME

Carcinoma.

Be suspicious of carcinoma when you obtain the following history in a patient over thirty-five: Diarrhea for the past months, preceded by a short period of constipation. The diarrhea at first is limited to the day; later the patient awakens at night with an intense desire to empty the bowels. He rushes to stool only to find that he is unable to pass anything but a little blood. This recurs four or five times each night and more frequently during the day. Loss in weight may be only slight.—*Int. Journ. of Surgery.*

Weather

Temp.

Cold east wind but
terrible muddy. Eugene & his
man was here for dinner on
their way home from Aylmer.
John took Melba's school & went
for her. I have been cleaning
at the parlor, what time I
had. Fixed Melba's blue skin-
over this morning for her.
