317 DAYS PAST

TUESDAY

49 TO COME

An Ample Percentage

of oxygen-holding and oxygen-contributing hemoglobin is necessary in order to insure a blood tissue of full physiologic potency. Pepto-Mangan (Gude) enriches the red cells, by supplying, in absorbable form, the organic iron and manganese needed to restore functional activity.

Weather

Temp.

Froze the hardest, last night it has this year. but fine, all day. Maude & Grace went to school. I painted the buggy wheels over again. Cecil was here, for the wheel to go to King's mill. John has been splitting wood all day. I have had the worst Rheumatism I ever had. Maude is better.
