

town I ran across Harry Moon trying to put in a block of the pavement over his tile drain so I helped him till dark. Then I met Babe going up to Ben Dwey's with a telephone message, so I went up with her and then went down to Auntie's for awhile. It has been a miserable day, cold, cloudy and drizzly also windy.

Thursday May 24th 

It has been a rotten day. Cold windy and drizzling rain most of the time. We puttered around all morning. Frank started to clean out the shop and I took some eggs over to Jack Martin and he paid me. Dad has been digging ditches all day and feels about as blue as a sick fish over the weather. Right after dinner Frank and I made another cement post and then I went down to Miss Martin's to get my lollyhocks, she gave a basket full of stuff besides lollyhocks were aster, snapdragons, nicotina and a few seedling dahlias. I set most of them out when I got home. I stopped in at Auntie's for a few minutes on my way home. Although there were a few fishers went down the road today according to the annual custom, there were very few and the old creek was not bristling with fish poles from St. Rycies to Colman's point as it would have been if it had been a hot sunny day as it generally is. Kolbe's ad. in the Maple Leaf is changed again. It is no longer wanted - Boys under 81 to make them selves generally useless about the fish house.
