164 DAYS PAST **WEDNESDAY** 202 TO COME

Fistula-in-Ano.

One of the primary essentials in the technic of the operation for the cure of fistula-in-ano is the opening up of the entire tract. This is a rule that has stood the test of time, and is a surgical classic. However thoroughly and skillfully the rest of the operation may be performed, there will be a recurrence if this fundamental procedure is performed incompletely. In many of the cases there is no difficulty in exposing the entire fistulous tract with one sweep of the knife, but in a very considerable proportion of cases there is failure.—Dr. J. A. Mac-Millan; *The Proctol.*

John has been cutting
this for all day. Boyde
helped him this

Weather cold & kept **Temp.**

Spitting rain, off and on,
all day. Quite a high wind
blowing. Rained very hard
& had a terrible electric
storm we thought that it
had struck, either one of the
barns. Maudie went to school
Mr Lewis was here to night
gathering money for Ezra
leaster & that are a going
to the front, I pulled & churned &
washed. Mr Lumsy was here and
the windmill. March 5-
