237 DAYS PAST

Friday

129 TO COME

The Profound Anemia

that sometimes follows the invasion of the blood by the malarial plasmode is due to the corpuscle-consuming action of the parasite. Prompt hematogenesis is distinctly indicated and **Pepto-Mangan (Gude)** is an ideal preparation with which to pleasantly and effectually repair the damage.

Weather

Temp.

A lovely day

Maudie & I took a walk to  
Alber in the morning  
& she was to give clues  
for dinner then they went  
& Helen, Berge & Mella  
had some bath filled  
Then in the evening  
Maudie & I went by  
Mr. Im Jung & white helped  
draw in oats. Maudie &  
I started taking Honey B. M.
