

I have been another every hot day. I put a nice breeze
Pick went down town to freight and bought a pair of shoes
He says that Hubby nearly collapsed with the heat and had to
go to take your baby to buy him some but after undressing and
lying in the grass for a couple of hours and having a stream
running
and
to
coming
back
to-morrow

Wednesday July 5th

Bill went back and mowed first
thing this morning and Cnah and I
went out and picked all the cherries.
We got about ten quarts. of
Daddy went out and fixed the
windmill and hoed some of the garden
and then went over to Uya's and got
another piece of chain for the well
and a pair of double trees. When
we got through with the cherries I
went out and hoed the rest of the
garden which looks fine. Then I
went and started to rake up and
saw the lawn that Daddy cut the hay
off of the other day but it will have
to be snipped off with the scythe.
After dinner Bill raked up and
Daddy and I cooked up and it was
awfully hot. I raked for a while
when I was got on the level.

Thursday July 6th

When I got up this morning I went
up to B. McKie's to ask him if he
would keep his cows in his own pasture
so as we could leave the gates open
into the hay field.
After breakfast I chased the calves all
over the orchard to feed them, and then
Hubby came and we pitched off the load
that was in the barn and then went out
to the field to get another load. Hubby
and I hunched up the windows where
they wanted to load. Daddy and Bill
took the load over to Mr. Patterson's
and Hubby and I went on cooking up
what was on the level. They got
back about eleven and put on another
load. Hubby and I went up to the barn
and I hauled some water for the horses.
The pump is broken and Dick went
down to ask old Phrycks to come over.
