

# MONDAY

## Wednesday, January 22

22 DAYS PAST

344 TO COME

March 22, 1907.

Dr. Lloyd L. Jones, Columbus, Ohio, says:

"I have had the pleasure of giving your preparation **Pepto-Mangan (Gude)** a trial, and am getting excellent results, better than I expected.

I am using it in a case of amenorrhea with anemia, which has defied treatment for some time; but am glad to say that the patient is doing nicely and is very much satisfied in having that function restored which has been absent so long."

A blizzard all the forenoon  
but turned out fine this  
afternoon. Girls have been  
baking & getting ready for  
school tomorrow. I haven't  
been well enough to do  
much to day. The little tramp  
came back to night.
