

think I was doing too badly when I could run up the G. scale two octaves and pretty nearly come down again and could also scrape off "Drink to me only" & "Son of My Saviour" so that you could tell what I was trying to play. Dick went down town this afternoon after spending the first half of the day in bed according to custom and got home to night about twelve. It has been a sunny day but a cold raw wind.

Monday March 1st

The first thing on the programme this morning was the presentation of another pair of lambs by Grey nose 118. I found them about half an hour after Dad. had looked in and found nothing. They were both dandy big fat, strong ones and didn't need any nursing at all. When the sun got good and hot Dad. turned the old ewe and lambs in the shed where they were out of the wind. We did chores all morning and this afternoon went down to say good-bye to Aunt & Aunt Alice as they left for the West tonight and are going to stay with Ray & Vernon to night. I took 6 dozen eggs over to Jack Martin and Enah took five dozen down town Jack said he wanted to send over a couple more roosters to put in the single comb pen. Mrs. M^r Bride was here washing all day. To night, Dick and I went to Simcoe as Dick wanted

to see a hockey match between Simcoe & Hamilton. Dad. assured us that the roads would be impossible as they said they were last Thursday but as Dick heard from several that they were good and as two or three had come down in automobile and as it was a lovely full moon to night. we thought we would risk it, we were very glad we did for the roads were as smooth and hard as could be hardly any snow left on them except in one or two spots. It was a very good game between the Seniors & Hamilton and finished in two periods with a score of 4-2 in favor of Simcoe. I think the Hamilton fellows were a little the best team but Simcoe's goal-tender saved them. I went over to the Armories before the match and had about half an hour's drill. The third contingent fellows of which there are about thirty from the 89th are living at the Armories. They are going to have target practice down in the basement next Wednesday and cut out the drill one night a week. Sunny but cold to-day!

Tuesday March 2nd

I felt rather tough to-day as I had a sore throat and a cold. I suppose due to my last night's exploit as Dick & I did considerable singing on the road home. First thing I went over to Martin's and got a couple of cockerels for the single comb
