**The Blood Deficiency in Chlorosis.**

Hemoglobinemia is the blood deficiency especially characteristic of Chlorosis. **Pepto-Mangan (Gude)** supplies the iron and manganese, in quickly absorbable form, to fortify and increase the hemoglobin of the vital fluid. It does this without disturbing digestion, and is, unquestionably, the most agreeable, dependable and generally available preparation with which to accomplish this necessary purpose.

Weather

Warm but

Temp.

rather pleasant & much cooler to night. In Chute & In Spence helped John & day. Charley Learn went thrashing for him this morning for George Davis & this afternoon for Clarence Cox. I finished painting the watering tank to day.
