

Thursday October 27th

Dad and I went over to Pickford's first thing this morning and found see two yearlings were with his cattle so with his help we drove them down the road and into the gully. We then came home and put off the load of clover seed and put another one all that was raked up, on and off before dinner. Joe Fidd was over to ask Dad about a sick cow but didn't delay much. I was out right after dinner and raked up the clover seed north of the mangle and Dad came out when he got the chores done and cooked about half of it up. When I finished raking I hooked on to the waygon and we put on what Dad had cooked which wasn't quite a load. It was about half past four when we got to the barn and then Mary and I went down and got a lot of plants from Miss M. Linn. They are getting all ready for their sale on Saturday. Mary stayed at the Bayleys for tea and went to the Bible study class to night. I went down after tea to chart a couple more boys but they didn't show up. Mary and I went up to the Bayley's prairie. It was very mild all day & raining to night.

Friday October 28th

It didn't rain much last night but we couldn't do any thing with the clover seed so I went down and got a load of coal as Clair Deal sent word over yesterday that there was a car in. I went over first and saw Billy Mills and borrowed their waygon as we can't use our old one. I went on down and saw Mr. Mullen and he said he would be over next week to buy a couple of ewes. When I got down town nearly to the track I met Harve Leary and he told me I would have to go to the Cannery factory to weigh as the scale were broken at the coal office, that delayed things and I didn't get home till nearly noon. This afternoon I went down and got another load, and then took the waygon back. Pickford came over after dinner and got another ewe for \$6.50. Aunty & Mary planted out a lot of the things we got from Miss M. Linn. This afternoon they all three went over to the Martins. Dad and Erch went down to choir practice to night and I spent part of the evening cutting an ugly face in a pumpkin for Lida's benefit. It has been a beautiful day, very mild, for tonight.
