

up. Although Dad went out after tea and worked till
 dark and I hatched my eggs to night and only took
 out seven out of the six ty this. Lela was over all the
 after noon and Frank went down with her to night.

Thursday July 27th

Frank raked up the alsike this morning. We were
 late getting around as we were delayed by one of the
 ranch teams we found him when we went out forthing
 at the mouth and bloated. Dad showed a long tube
 down his throat and that took the boat down.

When I did get out this morning I cut three of my
 four plots of wheat with the sickle, it took me till
 noon as it was mostly grass and I didn't want to
 get any thing but the wheat if I could help. Dad helped
 me cut the fourth plot after dinner, we got a fair
 sized sheaf of each plot. We got the binder out this
 morning and Frank got me round cut on the wheat field
 before dinner, after dinner he & Dad finished the field
 and got the binder back in the barn before ~~the~~ I
 had to back and put Snowdrop and John out of
 Pickers side hill field. They went through the corn

and we got the wheat all shocked up. To night Frank
 borrowed Jack Martin's democrat and he and I
 took little Joe and went over to Tommy Jackson's
 after the bees but it was such a hot night they
 were hanging out on every hive so he told us
 we would have to wait till it was cooler.

Friday July 28th

We hauled hay to day but didn't get very
 much done. We finished hauling off the field
 next the gully and west of the lane and got two and
 a half loads off it. We also hauled two loads
 off the field east of the lane. We put one load
 in the horse stable but that filled it up and we
 put the rest in the barn. It took some time to change the
 car. This afternoon Neff, the District Representative came
 in to look at Frank's garden and said it was pretty
 good for being put in so late.

Saturday July 29th

Frank took the mower out this morning and
 started cutting the weeds in the old corn stubble
