279 DAYS PAST

SATURDAY

87 TO COME

When the Iron Reserve is Insufficient.

The reserve supply of iron stored up in the body is said to be one of its physiologic "factors of safety." It is fed out into the circulation when required. When it is insufficient for the needs of the blood, anemia ensues. **Pepto-Mangan (Gude)** presents the organic ferruginous material for blood enrichment in eminently palatable, entirely tolerable and readily appropriable form.

Weather

Temp.

cloudy most of the
day & warm & sprinkled
a little. The girls went to
market. Maude Abell was
here. John along the d.
I am going to Eugene
Eugene is coming
for me. Maudie & Mrs
Bingham went to Aylmer
& the little Davis girls
road home with them
