Test for Bile in Urine.

Chloroform, as a test for bile in the urine, is delicate and certain. All that is necessary is to agitate a few drops of it in a test-tube, along with the suspected urine. If bile is present, the chloroform becomes turbid and acquires a yellowish hue, the depth of which is in proportion to the amount of bile present in the urine.—If no bile is present, the test-fluid remains liquid.—*Medical Summary.*

Weather

Temp.

Sunshiny, and cold. Snowed a little to night. Maud & Grace went to school. I went to town with Eva. Pa sold a load of hay to Neviles. Pa went to Kingsmill this morning and paid him all up.
