

Friday December 9th

Everything frozen up this morning and wind very cold but not so strong. I did up the chores & was getting ready to go down to the dentist when Dad. came over to look at the heifers mouth, so Mary called up Dr. M. Lachlen and he told me to come down at 1:30. We put the heifer into the horse stable and Dad. said she had two supernumerary teeth which should come out although they didn't seem to be cutting her tongue. She is just a skeleton and doesn't eat a thing lately. I tried to get the car started but couldn't so I walked over home with Dad. and had dinner there. I went down to the dentist right after dinner and he pulled a tooth and filled another. Frank came out here this afternoon and with the help of Cameron Culver who was here with the bread truck got the car started. One cranked & the other stepped on the starter. Frank drove it down town and got me and the parcel that I had for which I was mighty thankful as I felt rather tough. Did up the chores and went to bed soon after I had supper. Mary got a letter from Stinson saying that she was to get \$400⁰⁰ odd from Uncle George's estate. She was expecting about 150 so was greatly surprised. Papers today say \$130,000. Homey drove to Fish Haven, East Pier, Ben's dance hall and both houses.

Saturday December 10th

Went over to Lora's this morning with a little cream to put in the can. Tom went to town and got me a load of chestnut coal. I put the remainder of the manure he brought the other day on the flower bed. Put around a lot and helped Mary a little. Mary very busy and wild because she couldn't get green but finally had to use coal oil over. About four o'clock we all went down town and Gay stayed down to visit at Auntie's till after Sunday. She was very tickled and excited about it in her quiet way. Harry B. is going down when she comes home. He decided to let Gay go first ostensibly through gallantry and observing the principle of "ladies first" but in reality because he thinks if he goes last he can stay longer as Gay's visit ends definitely on Monday in order to let him go. She welcomed in his decision when it came time to come home and was very reluctant to leave. I had a hot & very enjoyable bath which then. Much milder to day with raw west wind. Snowing a little to night.

Sunday December 11th

We had a late breakfast and right after I drove Mary & Harry B. down to church. I came home again with the Wunipen and washed up the breakfast and last night's tea dishes and then
