59 DAYS PAST

307 TO COME

To Hasten Convalescence.

An appetizer, tonic and reconstructive is needed after scarlatina, diphtheria, measles, etc. Otherwise convalescence is apt to be unduly slow in the case of children whose nutrition is "below par." Pepto-Mangan (Gude) relieves anemic conditions, stimulates the appetite, tones the organism generally and acts as a mild but thoroughly efficient general reconstituent.

Weather

Very cold

Temp.

John took Melba & she came home with her box & bed. Mark was drawing wheat away. Clarence & his bride came home. Mrs Bingham & Wilfred was up. John helped Mark this afternoon. Maude is so much better. I washed a large washing.
