90 DAYS PAST

Sunday

276 TO COME

Rickets.

Wiener emphasizes the importance of enteroptosis, which he claims is always a sequel of preceding rachitis. He also calls attention to the invariable connection of enteroptosis with every case of scoliosis. The importance of early and energetic mechanical treatment of the bones, joints and muscles of the thorax is emphasized, especially as by this treatment many cases that would otherwise develop tuberculosis will be saved from the latter malady.

Weather

Temp.

cold to night
with north east wind
blowing. Nella & I was over
to Alitka & had a lovely
day. In-Dance & Eugene
went to church. Maudie &
Grace have gone to church.
Nella & I stayed for dinner
& tea

Gardner to Willey &
