

up Saturday. When we got up we found Rus Lamping here fixing the windmill and soon after Dr Grant and Frank went over to the old garden to load the straw berries and I sowed the rape seed on the back of the shop and just went in to get the team out to harrow it and the orchard over when it began to rain and a very heavy thunder storm came up and flooded things for half an hour or so and then cleared off but we couldn't do anything on the land. Ewah and Lil were down at the Zealand's at the Sunday school picnic but said they didn't get wet as they went in the house. Dr. Grant stayed to tea and Frank drove him down to the side walk after tea.

Friday July 12<sup>th</sup>

Dad and Frank have worked over in the garden hoeing and weeding all day. I spent most of the morning raking and cutting the lawn. This afternoon I finished tying up the tomatoes and then came up and dug holes for the beds of spring bulbs where they are marked on the blue-print. They are up near the road fence in the very stiff red clay so I just dug them about

foot deep and wheeled the clay up and dumped it in the mud hole under the gate at the north end of the horse stable and intend to fill them up with good earth to plant the bulbs in. Ewah went down town this afternoon and didn't come back for tea. So night Frank and I drove over to Horne Myers and put up the sign and the label on the flats. Horne called me up but he wasn't home so I left word for him to call him up in the morning if he could come down and spray to morrow afternoon. It has been very muggy and rather cloudy today. It sprinkled a little here but Horne Myers said it poured over there.

Saturday July 13<sup>th</sup>

Frank and I spent most of the morning hoeing over in the old garden. Dad went back and turned out some of the hay but said it would be too wet to haul this afternoon. This afternoon Frank and I went back and got part of the turnip patch hoed. Dad brought the bulko back but couldn't do much with it. He was going over to pick berries in the woods but saw Mrs. John Wess and a couple of other women heading for the patch and they scared him out. Young Myers came after me about five o'clock to go and help spray the potatoes so I
