

# Sunday, April 16

107 DAYS PAST

TUESDAY

259 TO COME

## A Competent Circulating Fluid,

i.e., blood with a sufficient number of erythrocytes of structural and functional integrity is required in order to overcome anemic condition. **Pepto-Mangan (Gude)** stimulates the formation of normal red cells, increases the hemoglobin percentage and acts as a general reconstituent.

Weather *rained a little* Temp.

*but still John cultivated all day. He had two little lambs to night! - the big valentine sheep I burnt the brush in the orchard today. Eva Boy was up to the barn a few minutes came over after her geese. The girls got their high school book to night!*
