

# Tuesday, January 18

18 DAYS PAST FRIDAY 348 TO COME

## The Heart in Syphilis—No. 2.

The signs and symptoms are those of cardiac disorder, and little or nothing, except the history, general aspects and the Wassermann reaction, may indicate the true etiology.

Treatment should be first along indicated circulatory lines, secondary as to time, but, most productive and important of all, it must be specific.

Good results, cures in many instances, will follow appropriate antisymphilitic treatment.—Harlow Brooks; *Am. J. Med. Sc.*

Weather Snowed a little Temp.

to day, of some last night very cold to night. John & Mr Leo went over to Lewis's & they killed his old fat sow & I have pawns, are to have half of it. Mr Leo took the milk this morning. John went with him & they both went to Aymer. Maucie & Melba went to Aymer. Sold three hens. I made Melba a pair of bloomers last night & two pairs to day
