328 DAYS PAST

Sunday

38 TO COME

Pediatric Points.

Remember that rise of temperature in the new-born infant during the first three or four days is believed to be due more to hunger than to any other cause. A small artificial feeding when the mother's milk is slow in coming will often relieve the fever, restlessness and dry hot skin without any other remedy.—*Trained Nurse.*

Weather

A fine day

Temp.

*but snowing most of night.
Maudie & I went to
church to night - had a
large crowd. Eugene's
Mr Dance & Gene Appleford
was here all day. Grace
was here & family.*
