248 DAYS PAST

118 TO COME

Geriatric Aphorisms—No. 18.

Aged exposed to diphtheria infection may show slight local symptoms including the presence of the bacillus without constitutional symptoms. Antitoxin is useless in these cases.

Headache and vertigo, intermittent and not affected by position, reading, light or sound are due to cerebral arteriosclerosis.—*Nascher; Amer. Med.*

Weather

Temp.

A fine day

Girls & I did pears & plums  
Maudie & Mella went to  
Aylmer, & took Apples  
for several of the folks,  
Mr Coy & Daddy went to  
Aylmer & returned their  
road lists. Clarence was  
up a little while this  
morning, got two sick  
horses & Dalley's Mike  
Mariah 10
