216 DAYS PAST

149 TO COME

Gynecological Hints.

A soft rubber or metal catheter is preferable to a glass one. "I have known of two instances," says Waldo, "where the end of a glass catheter was broken off and remained in the bladder. In sterilizing a glass catheter by boiling it may be so injured as to favor the occurrence of such an accident."—*Int. Journ. of Surg.*

Weather

Temp.

Nice day Boys at
the north lake. Took
old Billy with the other
horses & cut fifteen acres
of oats, have another
little field to cut. Mrs
McGay & Aggie was out
for the afternoon & went
home before tea bella
& Evelyn went to a luncheon
Billy 1/2 Polly 1/2 Dell 1/2
