

three o'clock, stayed at Auntie's to tea and went to church with them to night. They have started having church at 7:30 for the summer instead of 7 o'clock. I spent most of the evening up at Cousin Hollie's. Mary was at Essie's Birthday party. It was pouring rain when I started home so I stayed all night at Auntie's. It has been cloudy all day and it looks like an all night rain.

Monday June 10<sup>th</sup>

I didn't get up very early this morning and had breakfast down at Auntie's so Dad. was about through milking when I got home. Frank and I stretched a barbed wire along the west side of the lane as <sup>the lane</sup> part way up, as the colts have been bending the fence badly reaching over to eat the wheat. Dad. plowed and disked the garden back of the shop to day. This afternoon Art Quamby came over to help me put in fence posts so we worked at it all the afternoon. I borrowed Pickford's sugar and we got it all the posts along the side road but the two brace posts and got four in along the north side of the field. Sam came down and he and Frank finished planting the corn. In night. Frank and I went over to the J.F.A.

potato patch to hoe, there was a good bunch there to night and we got them all hoed and Bill Sidway and Charlie Stiff brought horses and cultivated so the plants look much better. We got through about dark and then Lloyd Ryerse, Tige & Albert W. Bill and Frank and I went down to the creek and had a swim but it was a little too cold for comfort the air especially. Dad. and Enoch & Ted drove down town to night to take Auntie Alice's milk down to her. Cool all day.

Tuesday June 11<sup>th</sup>

Frank and I took our dipping tank and powder up to Sam's this morning and dipped all his sheep in return for the corn planting. We got home before noon. Dad. spent most of the day working down the garden back of the shop and planting fodder corn on it and harrowing the potatoes. This afternoon Frank and I put in some more fence posts but didn't get out till late so Mr. Broadway was here. Frank had a stiff knee too. We quit early and he and I drove Deen to Simcoe to night to answer over medical questions for insurance. It got pretty black and very hot when we were
