

We hurried at it and I am afraid got it a little out of line. Each went down to the beaver meeting this afternoon and had to stay to the chair festival or whatever it is to night. She told me not to come after her but Dad thought he had better so I went down it was about nine o'clock when we got through tea so it was pretty late when I got down town and so I expected I couldn't find Each. I went down home for a while and when I got back we figured that I missed Each as she was coming through Martinsfield and Jack walked over with her. Frosty nights & hot days now. No wind.

Wednesday October 4th

We were very late getting out this morning and Dad and I didn't quite get another hole dug by noon. We finished after dinner and got another post up by six. We had quite a few visitors to-day which delayed us a little. Harvey Shand was past and said they expected a car of crushed iron in by Monday and wanted us to help in load it for the work. We haven't done any road work yet this year. Another lovely day hot and no wind.

Thursday October 5th

Dad and I spent most of the morning lining up the corner post at the crossroads but by noon we had a stake in that suited us. We just nicely got started to dig the two holes this afternoon (we were going to put down the brace post hole the same time as the anchor post as we can put down two as fast as one, one dig while the other spuds) when Jack Highland came along and wanted us to take our bluegrass seed down to the car so about three o'clock we went up and took our three bags and stopped and got six bags of Mr. Fleming's as he wasn't home. we got three dollars for our seed. We didn't have time to do any thing when we got home as we had to quit early to get down to County Alice for tea. We had a great time down there. Jim was there for tea but Joe Thompson called for him right after wards to go to Vittoria and supposed see the Dunkin's. Jim is home on what we suppose to be his last leave. The whole battalion is off. They have had a bad split in the 133rd. They have had a quarrel with Pratt and wanted him to resign but he wouldn't so Majors Jack some Busch & Libits Hammond, Donovan & Capt. Metc did resign.
