

April Saturday 10 1926

loyd Ross helped me on Saturday with the milk route so I finished up in pretty fair time. Everybody else went to town at night but I stayed home, fixed up the boxes and retied about ten bells.

Sunday 11

Alex brought part of my load of milk in on big truck. Called at hospital for a few minutes to see Earl Scott on way home. Mr Midgely, Mrs Midgely, Miss Midgely, Mr Bunnell, and Bobbie came out in afternoon. Vic came at Barbens at night. Heard Frieda Hyjvall sing over radio. Home at two o'clock.

Monday 12

Another fine day. Alex went to Fashen's sale and purchased another wagon for the farm. Felt pretty tired at night so retired at 9.30 as soon as we finished the chores across the road.

April Tuesday 13 1926

An ideal quiet bright spring day. New milk wagon arrived in Paris so Alex took it down to Gardner to get trimmed up. He was late getting home so it was late when we were ready for the roost.

Wednesday 14

nice bright morning with warm wind blowing but about noon it got cloudy and rained for a while then turned cold and froze hard at night. Had another time with Jean when she refused to climb milk house hill so had to tow her up with the truck.

Thursday 15

Alex took Jean's new collar in and got it fixed up so that it fitted her shoulders better and she went a lot better on the start.
