

November Tuesday 30 1926

An ideal Autumn day even if it was a little cloudy. Away on the milk route early but didn't get back until about one as I was busy collecting accounts. Filled up November statements at night and retired early.

December Wednesday 1

A very cold frosty day for the Provincial election when the D.F.C. and Govt Control were the chief issues before the people. 75 Govt Control members were elected when the Ferguson Govt swept the province. However I didn't lose my vote as H.C. Nislow was elected by a majority of 762. Dad came down to meet when I walked up home to go to Guelph the next day. Had an interesting chat with my parents before retiring.

Thursday 2

A dandy clear bright cold day for our trip to Guelph. Walked down to Barkus, then hunk my hand cranking the Dodge when we had difficulty in getting it to start. Had a fine trip to Guelph and back with Jean, the fair was interesting and Jean had some good news for me when we had a real chat together. Chicken supper when we got home. I missed the horse had some wonderful days with him. The snow on the home making a perfect day.

December Friday 3 1926

Hard that I was married and received several congratulations from different customers on the milk route after being absent the day before.

Saturday 4

Didn't freeze to death on the milk route even if it was a cold frosty day. Got my load of milk ready after supper, Roscoe cut my hair and I retired early.

Sunday 5

A very stormy and blustery morning. Off to town early, home and washed up by two. Took Jean up home for tea after I watched her milk nice time and an interesting chat with Dad and Mother before we came home. They had no objections to us getting married in the Spring or maybe I want to happen as Jean later had some good news for me.
