219 DAYS PAST

Wednesday

147 TO COME

When Regularly and Steadily Given

in conditions of Anemia, Chlorosis, etc., Pepto-Mangan (Gude) brings about a progressive increase in the number of, and improvement in the character and quality of the red cells, as shown by the periodic blood count. The subjective symptoms (weakness, anorexia, dyspnea, etc.) are dissipated and the normal pink color returns to lips, cheek and conjunctiva.

Weather

Temp.

Abel & Mergrey, Maude went to King Hill. Eugene came for Maude to help him thrash. I dewed all day. John cultivated the summer fallow this forenoon. Geo Cox was over to night. The two Norton boys came & took two more rabbits to night.
