

Sunday, March 5

65 DAYS PAST

TO ES DAY

301 TO COME

Definite Proof

of the vital integrity of the blood is the demonstration of a relative sufficiency of iron-holding hemoglobin, as a result of the hematologic test. **Pepto-Mangan (Gude)** "makes good" the ferric deficiency which exists in Anemic, Chlorotic and Marasmic conditions, and acts thus as a corpuscle constructor and hemoglobinogenetic.

Weather	Temp.
---------	-------

A dull day but -
 Thawed looked like rain
 Ed & Bayde came up &
 helped John to draw a
 load of hay from the east
 barn. Girls went to school
 & got old Mariah & had &
 she was very lazure to night -
 had a poultice on her
 foot. John drew the milk
 for Lev & Clarence was out
 for Eugene's, was out getting cows
 but didn't. Billy & Mariah & 6
