109 DAYS PAST

257 TO COME

Feb. 6, 1907.

Dr. Warren Montfort, Woodlake, Ky., says:

"I have prescribed **Pepto-Mangan (Gude)** for several years past and always with the most satisfactory results. In cases of anemia, it has acted like a charm for me—many times after other preparations of iron have failed."

Pepto-Mangan (Gude) is an ideal blood-builder.

Rained last night, has been lovely after the fog went away. Last wind, Maudie went to school. Melba is improving. John has been sowing the field east of the woods today. I washed & nurse has been doing the work
