55 DAYS PAST

SUNDAY

311 TO COME

The Anemia of Uncinariasis.

After the expulsion of the parasites, the Anemia of Hookworm disease should be vigorously combated. **Pepto-Mangan (Gude)** has been found, by numerous competent observers, to be especially efficient in the prompt correction of the blood impoverishment and general devitalization incident to this disease.

Weather	Temp.
---------	-------

a lovely warm day
 thawed all day. The little
 bear was out some of
 the record time. But
 the snow is quite high
 around them yet. Nella
 & I went to church to night.
 Mr Corbin sang alone.
 & Grover Becka. John has
 been on the run some
 place all day. An boy was
 over this forenoon.
