148 DAYS PAST

Tuesday

218 TO COME

Mistaken Diagnosis. No. 2.

4. Diagnoses of tertian malaria in patients whose symptoms resist quinin more than three days are almost invariably wrong.

5. Bronchial asthma beginning after 40 usually spells heart or kidney disease.

6. Epilepsy beginning after 40 usually means dementia paralytica or cerebral arteriosclerosis.—Cabot; Journ. Amer. Med. Assoc.

Weather

A fine day

Temp.

Maudie & Grace went to school  
Mr Young helped John LITTLE  
Kate had a heifer calf  
Melba started painting  
the ceiling. I had the  
swarm of bees that swarmed  
yesterday come out again today, but  
we took a card of credit  
with a queen cell in it  
& I think they will stay.
