8 TO COME

Children's Ills,

even when apparently mild in character, frequently result in anemia of greater or lesser degree. Because of its palatability, ready tolerability, and prompt and complete absorbability, **Pepto-Mangan (Gude)** is especially indicated in the various forms of anemia and general debility met with in pediatric practice.

Maude & Della went to
Oyler's this morning
Got a letter from Aunt
Celia last night with
two handkerchiefs for
the girls. Eugene was
over for dinner & brought
me a present of a quarter
of beef.
