344 DAYS PAST

Tuesday

22 TO COME

To Check Lactation.

Nothing has been found more effective than the administration of twenty grains of potassium acetate in water, three times a day. If there is much pain, codein may be given with it. According to recent studies at the Johns Hopkins Hospital it is not necessary to use a binder, a breast-pump or local applications of any kind. There is absolutely no danger of abscess.—*Medical Standard.*

Weather

Temp.

*Rained & was
foggy nearly all day.
Rowing hard to night.
Melba & I went to Auburn
to night's day bought
Maude's
Melba fixed down Jack
to day. Grace & Maude's
went to school*
