Sunday January 9<sup>th</sup>  
Enoch and I walked down to church this morning and I have been down all day I had dinner and tea at Auntie's. Miss Phipps was there to dinner. I spent the afternoon & evening up at the Angley's, before tea I got Cousin Fella & Cousin Phoebe to go over to the Angley's with me as they had the key to the house and got a Wandering Jew plant which Cousin Beasy left there to freeze unless Auntie took pity on in so I took it down to her. The Angley's all left for Toronto yesterday. They expect Joe Soper's battery to be moved to France next month. Auntie Alice and I went to church to-night. We thought Dad would have been down but I found out that he had had to go up to Bill Duncan's to see a sick horse. Dick and Frank have both been in the house all day to-day so Dick must be pretty bad. There were quite a few skating this afternoon but I didn't go. It is getting milder to-night.

Monday January 10<sup>th</sup>  
It rained during the night and has rained a lot during the day but is colder to-night. I went over to Granbury's to see Charlie this morning, he is better and sitting up but has

9  
had a bad time with his throat. On my way home I stopped in and got a setting of eggs from Jack Martin as one of the old red hens has been sitting for quite a while and Dad was very anxious to put some eggs under I thought it would be too early to have them come out. Dad & I didn't do much but chores this afternoon Auntie came over before tea to stay all night as Dad, Enoch and I went down to A. G. P. C. and the boys have been in the house all day. Dick was hound he was going to work yesterday but when this morning came he wasn't at all anxious to go. Glad Law and Mary Clark had a Dickens evening at A. G. P. C. to-night and Dad & Enoch sang "What are the Wild Waves Saying". Cousin Willie, Jack Martin and Auntie Maude also took part but there were very few there. Dad had to be chairman.

Tuesday January 11<sup>th</sup>  
It was frozen up this morning so after we got the chores done Dad and I got in a load of corn and another one this afternoon, we took two rows at a time so got quite a strip of land cleared, there are about two loads left and then yet we put it up where the clover seed was, and left the last load on the wagon, we couldn't get it in before on account
