

The Kingmelrose & Dan hay away

Thursday, July 13th

195 DAYS PAST SAIURDAY 171 TO COME

A Depleted Blood State

is frequently the causative factor of neurasthenic conditions. In such cases nervous equipoise cannot be fully restored until the hemic defect is corrected. In conjunction with other indicated measures, **Pepto-Mangan (Gude)** assists materially in the re-establishment and maintenance of neutral equilibrium and general systemic reconstruction.

The report from the Gude Mangan Pepto

Weather

Temp.

Warm sprinkled a few drops of rain the men John Per Chute Eugene & Philip Parker drew hay all day. They finished the growth east field & started the south east one on this side. Maucie went to Mr Caverlies & took some black currents, then to Ayliners house to night she & Evelin went to Ayliner. Melba drove the horses all day & load hay March 13

loaded but not the horses
