259 DAYS PAST

106 TO COME

**A Definite Result.**

An English physician writes, "I have used Pepto-Mangan (Gude) with benefit in the case of a boy of five, subject to so-called "bilious attacks", with abdominal pain, due to want of tone. There has been steady improvement in digestive power, with increased appetite, and the "bilious" attacks are much less frequent. Constipation has been overcome. The preparation is pleasant to take and does not blacken the teeth."

**Weather**

**Temp.**

an fine day  
had Mrs Marchant & I  
traced I made the  
childrens black drawers  
It was a horse  
making day all  
day. Took Eugene  
Calves over Eugene &  
Ateta went to the fair  
over to London
