

Mr Mc L

Wednesday, April 24

115 DAYS PAST

Thursday

251 TO COME

In Most Instances

the operative cause of Amenorrhoea and other menstrual irregularities is Anemia of greater or lesser degree. To restore regularity the hemic defect should be directly treated. Pepto-Mangan (Gude), by overcoming the deficiency of red cells and hemoglobin, is almost invariably successful in restoring regularity, unless serious organic disease is responsible for the anemic state.

Weather

Temp.

Very cold
Snowed off on all day
but not very much. Ground
frozen to night. With
a cold north west wind
Maude took her kit home
to night. Me & I cleared
part of the cellar to day.
John went to mill this
morning. Got eight lambs
