

Tuesday, May 11

The Vital Test,

of the efficiency of any hematonic is the increase of red cells and augmentation of hemoglobin. In the absence of serious organic complications incompatible with prompt recovery, **Pepto-Mangan (Gude)** always successfully meets this crucial test and is always "equal to the test," as demonstrated by the periodic blood count.

Weather

Temp.

Very warm this afternoon
 I drove the girls' school, down
 by Bet^t Thompson's, one of his
 old cows laced up & turned
 around, nearly up set the
 buggy & threw me out, we
 had old Mariah. I went for
 the girls' food & painted the
 board & I painted the
 summer kitchen cup board
 door. John is ploughing his
 cornfield & doing odd jobs.
 Mariah to Dalley 2 1/2
