24 DAYS PAST

342 TO COME

Pepto-Mangan (Gude) is an ideal ferruginous preparation, because:

1. It causes a rapid increase in the number of red blood corpuscles and the percentage of hemoglobin.
2. It does not derange the stomach in any way.
3. Far from causing anorexia, it actually increases the appetite.
4. It is palatable—a point of great importance in the treatment of women and children.
5. It does not constipate.
6. It does not affect the teeth.

A beautiful sun shined
day. Girls drove to school
Tramp ran away again
to night. I did a large
washing. Albert was up
for some apples. King's milk
man was here & brought
me two new table clothes
