331 DAYS PAST

35 TO COME

Prompt Hematogenesis.

The profound anemia that sometimes follows the invasion of the blood by the malarial plasmode is due to the corpuscle-consuming action of the parasite. Prompt hematogenesis is distinctly indicated and **Pepto-Mangan (Gude)** is an ideal preparation with which to pleasantly and effectually repair the damage.

A fine day

Maudie & Wilfred went to
Sunday school. Dr. Dg was
here twice, Albert helped
him once, & we helped
him once. Maudie & Audrey
was here for supper. Mrs &
George was down to the
House went home.
