288 DAYS PAST

MONDAY

78 TO COME

Geriatric Aphorisms—No. 20.

Belladonna prevents the griping of aloin by counteracting the peristaltic stimulation of the latter. Much smaller doses of aloin can be given if the belladonna is omitted.

Secondary effects of drugs may act more powerfully upon the senile organism than the primary or desired effect.—*Nascher; Amer. Med.*

Weather

Temp.

Rained some
this morning, I got up early
& did my chores, then went
to Eugene, & Eugene
helped me & I got about
sixteen bushels of apples
John went to a sale
down to the tye yards
bought a new set of
heavy single harness
Mrs is holding her own
to night
