

Saturday, February 7

38 DAYS PAST

327 TO COME

Surgical Suggestions.

A needle fragment in the fleshy palm, where the muscles are compact and in more or less constant activity, will be displaced more in a few hours than one in the sole of the foot, where the intrinsic muscles are deeper, less compactly disposed and less active, and where, also, the dense plantar fascia sometimes holds the needle.—*Amer. Journ. of Surg.*

Weather Cold & Blustery all day Temp.
snowed a little. Pa, Eugene & Maud
went to Aylmer, after dinner.
Maud joined the library today.
Pa had Polly shod. Got the grist
from Kingsmill. Mr. Conroy died
at nine this morning. I have been
canning quince meat all day, got
twelve eggs. Eugene has now
gone down to Birmingham.
Sent the hides away to get
tanned. Had a letter from
Mrs. Doerington, with a little
dolley in it. Good wheeling

Polly 10.
