

Tuesday March 30th

Dad. fed the calves this morning but hasn't been out of the house since and feels very miserable. His head ached to night. It took me all day just doing chores. I went over to Martins for a minute or two this afternoon. To night I spent an hour and a half leg banding the pullets with stone pipe wire. Cold & windy to day, not so bad as yesterday.

Wednesday March 31st

Although Dad. has felt much better to day he was not able to get out of the house at all, so I was busy all day with Chas and Frank helped me when he came home, this afternoon I rode Joe down to the Rogerses to tell Calin I couldn't go to Simons to night. This morning a man walked over here from town to see the old duelling pistols. He is a traveller but told Dad. that at his home is in St. Mary's and that he had over two hundred firearms besides swords, dirks and such like. He would have liked to have bought them but didn't take to say so. He said the sight of them was well worth the walk. Sid M. Bride was in to night selling fertilizer & hinder some. Dad. ~~ordered~~ ordered 50 lbs of the latter. We heard on Monday from Ray they were coming up to morning for Easter. It hasn't been nearly so cold to day but cloudy.

Thursday April 1st

Dad. helped me milk this morning but his mouth was pretty sore and he wasn't going out again but John Wees came over with his engine to saw up the rail piles. Dad. had to be out all day. As Vernon & Rebecca were coming up on the eleven o'clock train I had to leave to go down and meet them, that made us short landed so I called in at the school house and sent Frank home. He was very good about it and ^{didn't} seem to mind very much. Hubby was down at the station and I got him to come over. In the afternoon there was lots of help and they got through in lots of time. Vernon & Rebecca arrived safely. Dick Kobler & Aunty Maude were down at the station. I did chore most of the afternoon and to night drove down to meet Ray. Miss Ethel Phipps came up on the same train so we drove her home. Not at all windy but rather cold.

Friday April 2nd

When we got up this morning the ground was white as it had snowed a little in the night so as there was no wind I went out before breakfast and sowed about half the clover seed on a not quite half the field of wheat which is on the old sleigh stubble. I spilt a little of it by pulling
