Monday, May 45-

125 DAYS PAST

241 TO COME

April 10, 1907.

Dr. S. C. Shurich, Klawock, Alaska, says:

"I received the bacteriological chart you sent me, and it is certainly fine from every point of view, and I thank you very much for it.

I have had the pleasure to prescribe your **Pépto-Mangan (Gude)** in several cases of anemia and found it all I could wish for as a reconstructive and bloodmaker."

Rained all day, nothing much doing only house work & chores. The girls & I crocheted all day besides our work.
