151 DAYS PAST

214 TO COME

## If Long Continued,

pre- or post-operative sepsis leads to anemia, as does also long continued suppuration or post-operative hemorrhage. After the cessation or removal of the operative cause, **Pepto-Mangan (Gude)** can be depended upon as the ideal hematic in the reconstructive treatment of such cases.

Weather

*A fine day but* Temp.

*rather windy & warm. We washed & ironed in the evening. Took the girls & went for them, got Billie shod in the morning, stayed at Mrs M<sup>rs</sup> Leays until he was shod. John worked on the road & drew one load of gravel. An box was used for the evening.*

*Billey 15 Polley 8. Mariah 10*
