Silver Salts in the Urethra.

The "penetrating action" of silver salts, which is so frequently praised, is not needed in the posterior urethra as much as in the anterior. In the posterior urethra silver nitrate acts better than in the anterior, while in the latter the newer silver salts are to be preferred, as being more penetrating.—*Med. Review of Reviews.*

Weather

Temp.

A fine day
Melba & I went to Sylva
& got the tires set on
the little buggy. John
& Mr. Chute half of the
ten acres this forenoon
& drew in oats after
dinner. We saw Madam
Spence fall down in
town to day
