286 DAYS PAST SATURDAY 80 TO COME

Endocarditis in Children.

Floyd M. Crandall says the management of the acute stage has been a comparatively simple matter—rest in bed for six weeks to two months. This quietness should be continued if the heart becomes irregular or too rapid. Difficult problems may arise, after the child is out of bed, with a murmur. It is a mistake to maintain restrictive treatment too long. As to exercise to be permitted, the action of the heart is the best guide under exercise. Arbitrary rules do more harm than good. Each case should be studied and the patient, rather than the disease, treated.

Weather

Temp.

Rained some
this morning. Girls went to
St Thomas & to night to
Aylmer. Audra Davis
was down twice to sleep
John played bed all sleep
Had two pebbles curb
We blackened the boiler
stone & put it up & ironed
