354 DAYS PAST

12 TO COME

To Prevent Postoperative Nasal Hemorrhage.

Shrink the tissues with adrenaline chloride solution one to 1,000, cocaineize parts with ten per cent. cocaine solution, cut with scissors or snare the hypertrophied tissue, cauterize with electrocautery the cut surface only, then pass over with 100 per cent. silver nitrate solution on an applicator.—Schwartz; *New York Med. Journ.*

Weather

Temp.

A fine day
but cold this morning
a few snow flurries,
John has been helping
Abe to move his house
from Ayler's, only got
it as far as town. Mrs
George Davis came & took
Maudie & Melba out to the
Baptist entertainment
to night. Girls drove the
cutter for the first
