308 DAYS PAST

SUNDAY

58 TO COME

**Typhoid-Differential Diagnosis—No. 2.**

From miliary tuberculosis and tuberculous peritonitis, it is distinguished by blood cultures, by the Widal, and the tuberculin tests.

Chronic and acute pulmonary tuberculosis are sometimes mistaken for typhoid fever, but in these conditions thoracic symptoms are more marked, variations of temperature are less regular and more extensive, and sweating is more common and more profuse.—Rueck; *Med. Record.*

**Weather**

**Temp.**

Cold east wind  
& raining a little to night.  
Eugene & Aletta, came  
over this afternoon, & stayed  
for tea. The girls & I was  
home all day. John was  
down to heds this morning.
