78 DAYS PAST

MONDAY

288 TO COME

The Early Recognition of Cancer.

CARCINOMA OF THE CHEEK is accompanied in its earliest stages by a condition resembling lock-jaw. Whenever the latter condition is present in a person of middle age, a thorough search should be made for a possible small ulceration on the inner surface of the cheek, which may be hidden in the folds of the mucous membrane.—Levin; Archives of Diagnosis.

Weather

a fine day

Temp.

thawed out such a lot.  
Girls went to school, Maudie &  
I took the little Ashyero  
calf to two horses at Kingsmill  
John took six pigs down to Mr O  
leaverlies, got nineteen fifty  
five hundred, & they weighed  
twelve hundred. Melba & I was  
over to Clarence's, & John was  
over to Mr Cores
